TASK 2 TAPESCRIPT

One of the biggest problems we have in our cities is food waste. In every city around the world, a huge amount of food is wasted and thrown away every day. According to our research, one-third of the world's food is wasted. Furthermore, there are large numbers of people living on the street who are hungry and can't afford to feed themselves. On the Street Food Bank is a project which works with shops and cafés to help reduce food waste.

We take food that is going to be thrown away and give it to people who need it. The project is run by volunteers. We collect food from businesses at the end of the day so it doesn't get thrown away. We collect ready-made food like sandwiches and salads, and we deliver it to people who are homeless on the streets.

We started the programme because we were so shocked when we saw how much food cafés and shops in the city were throwing away every day, when there are so many homeless people on the streets who don't have anything to eat. The purpose of On the Street Food Bank is to try and solve that problem, or at least to help reduce the problem.

We have an app, which businesses can use to tell us when they have food that's available to be given away. The app then notifies one of our local volunteers, who arrives to collect the food and distributes it to people who need it. We've only been doing it for about a year, but we've already had a pretty big impact on the local community. I'm really proud of what we've achieved so far.
