

# FACILITIES FOR SPECIAL NEEDS STUDENTS

**Koszalin University of Technology** is a modern institution that engages in numerous innovative initiatives. Among these efforts, we strive to create a welcoming environment for individuals with special needs. We place a strong emphasis on eliminating architectural barriers, which enhances the accessibility of our facilities and allows everyone to benefit from the educational opportunities at Koszalin University of Technology. This includes features such as modern elevators with Braille markings, convenient driveways to buildings, and specially adapted restrooms.

Depending on the degree of disability that may affect class attendance, the University offers the option to attend classes according to an individualized study schedule. The decision, made at the request of the individual, is determined by the Dean of the Faculty in collaboration with the Rector's representative for disabled persons. Upon request, the Dean appoints a faculty guardian for the student. The guardian's role is to identify and communicate the student's specific needs to the Dean, ensuring that the teaching process is organized and implemented in a manner that accommodates the type of disability.

## **Support Offer:**

- Advice, guidance, and assistance on any matters related to disability
- Accommodation in a dormitory tailored to the needs of individuals with disabilities, including specially prepared apartments and elevators
- Assistance for individuals with disabilities
- Physical education classes offered in alternative forms
- Special adaptations of computer stations (including those in the library)
